“Good design  
is where science  
and art meet in  
decorum.”

Robin Mathew

Neolith<sup>®</sup>: the stone, the brand,  
the legend, the future.

---

Founded in 2009, Neolith, the market-leading brand of Sintered Stone is a revolutionary product which has become a material of choice for architects, designers, specifiers and fabricators.

This pioneering material can be specified for the most demanding interior and exterior building projects. Combining high-definition detailed decoration with high-performance qualities, Neolith offers the triple reassurance of strength, beauty and longevity.

#### **What is a Sintered Stone?**

Sintered Stone is a 100% natural material based on granite minerals, glass minerals and natural oxides:

1. Granite Materials: Quartz and feldspar, giving hardness and strength to the surface.
2. Glass minerals and silica, which ensures chemical stability.
3. Natural oxides, which deliver chromatic properties.

#### **How is Sintered Stone produced?**

Neolith is produced using the very latest in sintering technology, replicating the thousands of years' process by which natural stone is formed in a matter of hours.

The raw materials which form the slab are first subjected to extremely high pressure, going through a pressing machine where a weight of 400 bars is applied. In the second phase of the process, the slab goes through a kiln where temperatures reach more than 1200°C (2200°F).

This process of ultra-compaction creates full-body surfaces with unique technical features.

**Decoration:** Neolith has always been at the forefront of sustainable approaches within all of its manufacturing processes. A 100% natural composition requires an equally ecological production method.

Building on our pioneering Neolith Digital Design (NDD), we have aimed to incorporate organic practice into the way we print our slabs.

Hydro-NDD 2.0 takes our technology to the next level. Using a water-based ink, as opposed to the industry standard solvent base, we have succeeded in offering a sustainable surface which never compromises on the quality expected from Neolith Sintered Stone. All our slabs maintain the same definition and detail of pattern and design.

**Performance:** Tried, tested and trusted, Neolith's combination of realism, high performance and versatile formats make it a go-to material for architects, designers, specifiers and fabricators.

**Applications:** Neolith is the optimum surfacing material for both indoor and outdoor applications. From a skyscraper façade to a kitchen worktop, Neolith's physical and mechanical characteristics deliver ultimate performance, unmatched beauty and long-term value.

Neolith represents 10 years of selecting the very best materials, processes and people. It has been an exciting journey in which we have founded a brand which continually pushes the boundaries and highlights the potential of Sintered Stone.

---

---

# “Diseño es donde ciencia y arte llegan a un punto de equilibrio.”

## Neolith<sup>®</sup>: la piedra, la marca, la leyenda, el futuro.

---

Fundada en 2009, Neolith, la marca líder de Piedra Sinterizada, es un producto revolucionario que se ha convertido en un material de elección para arquitectos, diseñadores, especificadores y fabricantes. Este material pionero se puede especificar para los proyectos de construcción de interiores y exteriores más exigentes. Al combinar una decoración de alta definición con cualidades de alto rendimiento, Neolith ofrece la triple garantía de fortaleza, belleza y longevidad.

### ¿Qué es una Piedra Sinterizada?

La piedra sinterizada es un material 100% natural a base de minerales provenientes de granito, minerales de vidrio y óxidos naturales:

1. Materiales de granito: Cuarzo y feldespato, que confieren dureza y resistencia a la superficie.
2. Minerales de vidrio y sílice, lo que garantiza la estabilidad química.
3. Óxidos naturales, que entregan propiedades cromáticas.

### ¿Cómo se produce la Piedra Sinterizada?

Neolith se produce utilizando lo último en tecnología de sinterización, replicando el proceso de miles de años mediante el cual se forma la piedra natural en cuestión de horas.

Las materias primas que forman las tablas se someten primero a una presión extremadamente alta, pasando por una máquina de prensado donde se aplica un peso de 400 bares. En la segunda fase del proceso, la tabla pasa por un horno donde las temperaturas alcanzan más de 1200°C (2200°F).

Este proceso de ultra-compactación crea superficies full-body con características técnicas únicas.

**Decoración:** Neolith siempre ha estado a la vanguardia de los enfoques sostenibles en todos sus procesos de fabricación. Una composición 100% natural requiere un método de producción igualmente ecológico.

Basándonos en nuestro sistema pionero en el diseño digital (NDD), nos hemos propuesto incorporar la práctica orgánica en la forma en que decoramos nuestras tablas.

Hydro-NDD 2.0 lleva nuestra tecnología al siguiente nivel. Al utilizar una tinta a base de agua, a diferencia de la base solvente estándar de la industria, hemos logrado ofrecer una superficie sostenible que nunca compromete la calidad esperada de la piedra sinterizada Neolith. Todas nuestras tablas mantienen la misma definición y detalle de patrón y diseño.

**Rendimiento:** Probada, ensayada y fiable, la combinación de realismo, alto rendimiento y versatilidad de formatos de Neolith lo convierten en un material para arquitectos, diseñadores, especificadores y fabricantes.

**Aplicaciones:** Neolith es la superficie óptima para aplicaciones tanto en interiores como en exteriores. Desde la fachada de un rascacielos hasta la encimera de la cocina, las características físicas y mecánicas de Neolith brindan el máximo rendimiento, una belleza inigualable y un valor a largo plazo.

Neolith representa 10 años de selección de los mejores materiales, procesos y personas. Ha sido un viaje emocionante en el que hemos fundado una marca que continuamente empuja los límites y resalta el potencial de la Piedra Sinterizada.

---

# Certifications & Awards

## Certificados y Premios

Neolith has an industry-wide reputation for excellence and attention to detail. With a collection comprised of over 50 high-performance and strikingly coloured designs, the brand has become the surfacing material of choice for a vast array of interior and exterior applications.

Since its foundation in 2009, Neolith has received recognition through international design and architecture awards for its forward-thinking, innovative approach and the high quality of its products and processes.

These accolades reflect Neolith's pioneering spirit, a company continually evolving to meet the needs and expectations of current and future clients.

Neolith se ha ganado una reputación en toda la industria por su excelencia y atención al detalle. Con una colección compuesta por más de 50 diseños de altas prestaciones y colores llamativos, la marca se ha convertido en la superficie elegida para una amplia gama de aplicaciones interiores y exteriores.

Desde su fundación en 2009, Neolith ha recibido el reconocimiento a través de premios internacionales de diseño y arquitectura por su enfoque innovador y vanguardista y la alta calidad de sus productos y procesos.

Estos galardones reflejan el espíritu pionero de Neolith, una compañía en constante evolución para satisfacer las necesidades y expectativas de los clientes actuales y futuros.

# Neolith® Gallery

The current Neolith collection is composed of 46 different models that are grouped in 6 collections. Most of those 46 models are available in more than one finish and thicknesses and even some of them have Bookmatch and Endmatch options.

For not getting lost in this wide variety of possibilities that the Neolith 2020 catalogue offers, we introduce this updated version of the already popular Neolith Gallery where all references are included.

La colección actual de Neolith se compone de 46 modelos agrupados en 6 colecciones. La gran mayoría de esos 46 modelos están disponibles en más de un acabado y espesores distintos e incluso algunos de ellos disponen de opciones Bookmatch o Endmatch.

Para no perderse entre la gran variedad de posibilidades que ofrece el catálogo Neolith 2020, presentamos esta versión actualizada de la ya popular Neolith Gallery donde se incluyen todas las referencias disponibles.

# Bookmatch & Endmatch

The Estuario, Calacatta, Calacatta Gold, Blanco Carrara, Nero Marquina and the new Calacatta Luxe models have the possibility of being presented with a Bookmatch effect (mirror effect) the same way the natural marble can be directly extracted from the quarries. For each model there exists a Reverse option (referred to with an “R”) which enables to create boockmatch options.

The Endmatch is a very special feature that the design of the Calacatta, Calacatta Gold, Blanco Carrara and Nero Marquina own. Using the same slab just turning it 180°, it's possible to obtain continuing veining with endless pattern.

Los modelos Estuario, Calacatta, Calacatta Gold, Blanco Carrara, Nero Marquina y el nuevo Calacatta Luxe permiten la posibilidad de presentarse con efecto Bookmatch (efecto espejo) de la misma forma que el mármol natural es directamente extraído de una cantera. Para cada modelo se ha creado una versión reversa (marcada con “R”) para presentar efectos Bookmatch.

El Endmatch es una característica muy especial que tienen los diseños de los modelos Calacatta, Calacatta Gold, Blanco Carrara y Nero Marquina. Usando la misma tabla, sólo girándola 180°, puede obtenerse un patrón de vena continua sin fin.

# Design variants in 6mm

## Variantes de diseño en 6mm

---

**To avoid the repetition of design in some Neolith models of 6 mm thickness, variants have been created which will be sent in a random manner once these colors are ordered, without the possibility of choosing the specific design, this does not apply to other models like Estuario for example, you are still able to choose between 1 or 5.**

Para evitar la repetición de diseño en algunos modelos Neolith de 6 mm de espesor, se han creado variantes que se enviarán de forma aleatoria, en los pedidos de estos colores, sin la posibilidad de elegir el diseño como por ejemplo ocurre con otros modelos como Estuario 1, y 5.
